

DIRECTIONS FOR APPLICATION

The normal application rate for NITRO 23 is one to two quarts per 1000 square feet of turf grass.

All THI products should be watered in through the normal irrigation time cycle immediately after application by a sprayer unit. All THI turf products can be injected through an irrigation system as long as that system was designed for fertilizer injection.

Information regarding the contents and levels of metal in this product is available by calling 1-800-834-2001.
